

## **Storytelling with Data Presentations**

Storyboard Outline:

1. Briefly touch on what our subject is and how it affects the USA.
2. Show data on deaths from influenza. Highlighting the ages most affected by the fatal effects of the virus. Create an interactive line chart of deaths by month and year.
3. Show trending deaths to reiterate that the death tolls has increased with people at an advanced age.
4. Conclude the states that are in need of additional help and at what time of the year they need it.
