

## Textual Analysis

Various colors were picked for both the Word Cloud and the Packed Bubble Chart. There are not real reasons for the colors used.

In the Word Cloud I narrowed phrases down to the top 10. There are several repeats as I didn't actively clean the data prior to working with it. In the visual you can see the top three phrases are "Human Papilloma Virus", "-", and "Don't Know". It is hard to tell which text is used more the "Human Papilloma Virus" or "-".

In the Packed Bubble Chart, you can clearly see when using size that the "-" response is used more than "Human Papilloma Virus". "Don't Know" is the third most used phrase in the data sheet.
